

FIND PROFITABLE STARTUP IDEAS USING REDDIT & AI

THE 4 STEP GUIDE TO FINDING INTERNET GOLD
INCLUDING TOOLS, TIPS, AND BEST PRACTICES

GREG ISENBERG

HOW TO USE REDDIT AND AI TO FIND & VALIDATE WINNING STARTUP IDEAS

Reddit is a diamond mine of startup ideas. Today, you'll learn how to find them. I am going to show you how to sift for internet gold.

THE 4 STEP PROCESS

STEP 1

FIND WHAT'S TRENDING ON REDDIT.

STEP 2

IDENTIFY PROBLEMS & SOLUTIONS

STEP 3

FIND CONTENT CREATORS IN YOUR NICHE.

STEP 4

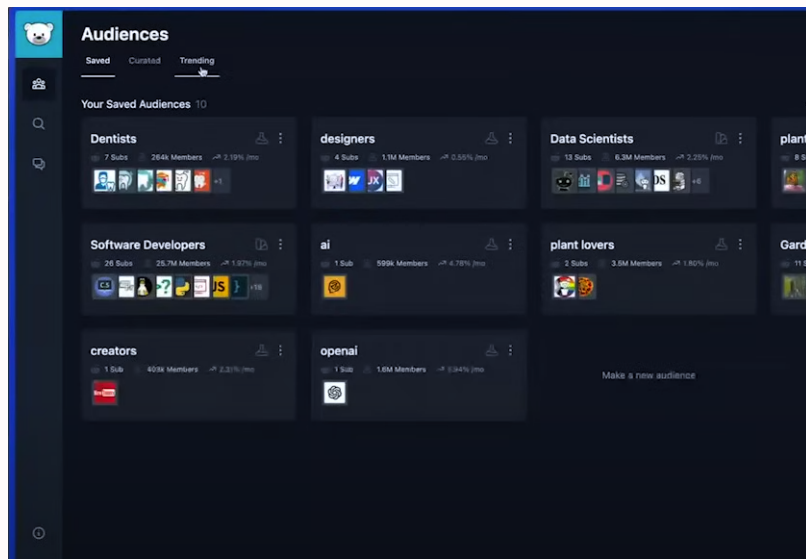

WIREFRAME & LAUNCH

BONUS: STEP 5

CREATE CONTENT PEOPLE WILL LOVE

BONUS #2

VIDEO TUTORIAL FOR MY EXACT PROCESS

STEP 1**FIND WHAT'S TRENDING ON REDDIT.**

Use [Gummy Search](#) to find promising subreddits:

1. Go to the trending section within [Gummy Search](#).
2. Focus on subreddits with 10,000 to 100,000 members. These aren't the massive subreddits, but they're substantial enough to build a business around.
3. Look for subreddits that are growing rapidly. You can sort by daily, weekly, monthly, or yearly growth.
4. Ask yourself:
 - Is this interesting?
 - Do I have the ability to create something here?
 - Do I have an unfair advantage in this subreddit?
5. Start taking notes in a notebook or Google doc about anything that catches your attention.

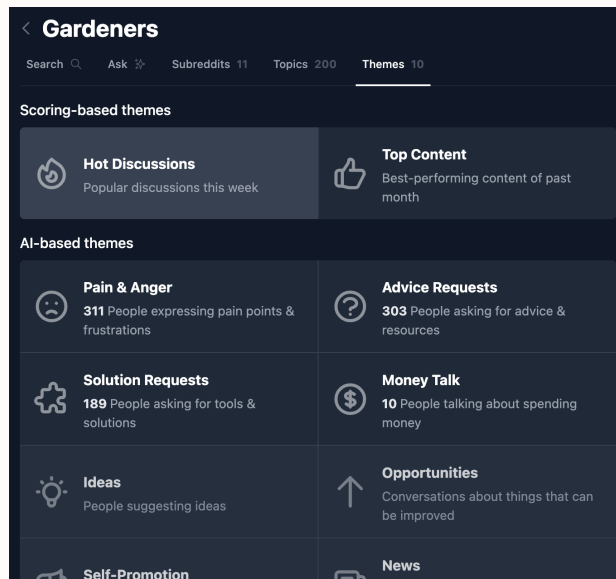

These subreddits answer the “why now?” question:

Why should I go and build something for this community?

→ It's a newer community, and it's trending. It's in people's minds.

→ These growing communities often represent emerging opportunities. (and if you can recognize them you'll always be ahead of the curve.)

 **Pro-tip:** Check Gummy Search every few weeks for new trends.

STEP 2**IDENTIFY PROBLEMS & SOLUTIONS**

Once you've found an interesting subreddit, dig deeper using Gummy Search's analysis features:

1. Use the "pain and anger" category to identify common issues. This section summarizes the frustrations and challenges faced by the community.
2. Check the "advice requests" category to see what people are asking for help with. This gives you insight into the specific needs of the community.
3. Look at the "solution requests" to understand how people are currently solving problems. This can help you identify gaps in the market or areas for improvement.
4. Analyze the patterns that emerge. Look for recurring themes or issues that come up frequently.

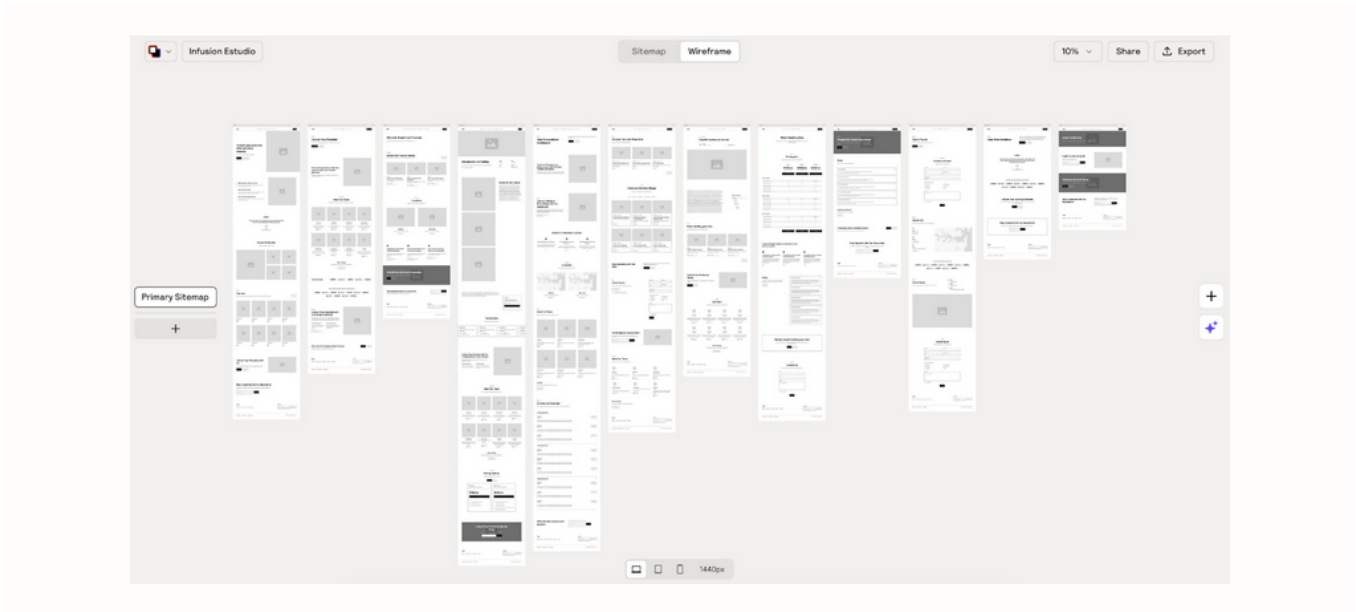

Write down observations and ideas as you go.

STEP 3**FIND CONTENT CREATORS IN YOUR NICHE.**

Understand your market better:

1. Use [Perplexity AI](#) to find top influencers in your chosen niche. Prompt it with something like "Give me the 25 most popular [niche] influencers on YouTube". Be specific.
2. Go to their YouTube channels and sort videos by most popular. This shows you what content resonates most with the audience.
3. Read through the top comments on these videos. Pay attention to:
 - Questions people are asking
 - Problems they're mentioning
 - Experiences they're sharing

This step helps you put yourself in the shoes of your potential customers, understanding their needs and motivations on a deeper level.

STEP 4**WIREFRAME & LAUNCH**

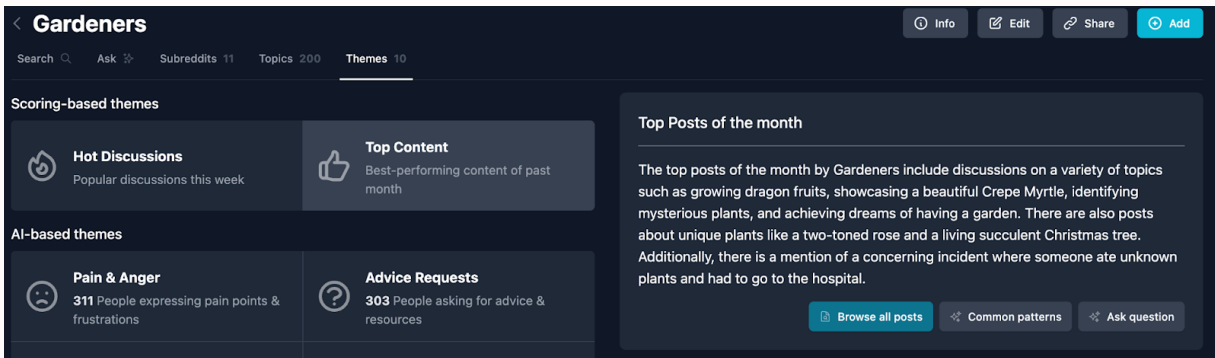

Now that you have a validated idea, it's time to bring it to life:

1. Create a wireframe of your product or website. This doesn't need to be complex - focus on the core functionality that addresses the problem you've identified.
2. Use tools like [Framer](#) (or [Relume AI](#)) to quickly build a prototype landing page. The goal is to have something tangible that you can show to potential users. (and validate their interest by having an email capture on the page)
3. Start posting on socials about your idea to gauge interest and gather feedback. You can return to the subreddit you identified in Step 1 to share your concept and get initial reactions.

The key is to move quickly from idea to implementation.

Don't get bogged down in perfecting every detail - get something out there and iterate based on feedback.

This feedback loop is critical.

STEP 5**CREATE CONTENT PEOPLE WILL LOVE**

Use Gummy Search's "top content" feature to supercharge your content creation:

1. Identify the best-performing content in your niche. What types of posts get the most engagement?
2. Understand what formats work well. Are stories popular? Memes? How-to guides?
3. Use AI to analyze patterns and generate content ideas. You can ask Gummy Search questions like "Do they love memes in this audience?" to get more specific insights.

Create content that aligns with what's already working in the community, but with your own twist or perspective.

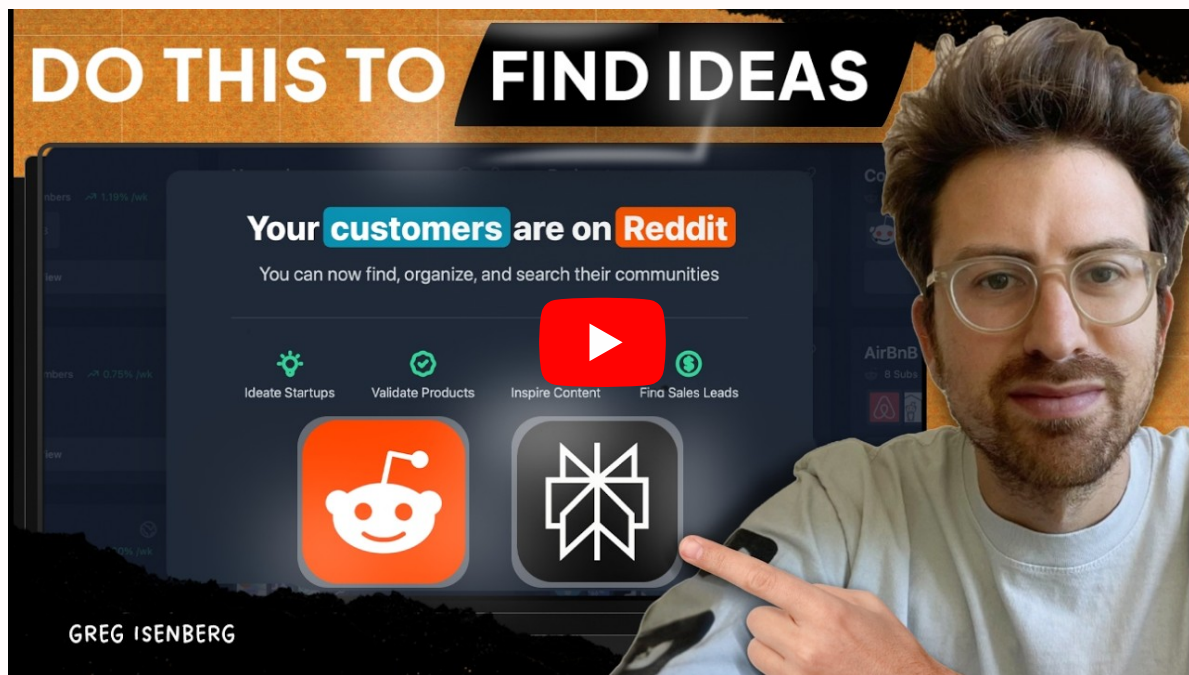

TIME TO FIND SOME GOLD.

Observation and validation are key. Use these tools to teleport into communities, observe their needs with X-ray vision, and create solutions that resonate. This way you're not just guessing – you're building on validated ideas and real community needs.
